RE: Request for Video Footage

I am respectfully submitting this letter in the best interest of justice. I would like to know whether defense council for following dockets has video footage of incidents and would like for the defense to disclose this information within 30 days of this letter. Video footage is the best way for me to prove my claims as well as show defendants neglect, failure to intervene, failure to prevent and lastly personal involvement and liability. Corporation Council has a history of failure to comply with producing video evidence that proves officer misconduct and by law should be preserved for 3 years for litigation. This is a government agency that has custody of me and should produce all video footage to properly litigate these claims in accordance with federal mandate Nunez Monitoring Report as well as Records Access Law. Trials division, to the best of my knowledge has access to all departmental cameras which is furthermore reason why all video footage should be available for defense council.
